PROFESSIONAL SUMMARY

Results-driven Statistician and Software Engineering graduate specializing in Machine Learning Systems, MLOps, and Data Science. Proven capability in architecting end-to-end ML pipelines with automated drift detection, building production-ready APIs, and designing scalable real-time ETL data streams. Combining a rigorous statistical background with modern cloud infrastructure and DevOps practices to deploy reliable, enterprise-grade AI and data products.

TECHNICAL SKILLS

MLOps & Cloud Infrastructure: Google Cloud Platform (GCP), CI/CD Pipelines, Docker, Hugging Face deployment, Automated Logging, Model Drift Detection

Data Engineering & APIs: ETL Pipelines, FastAPI, REST APIs, Web Scraping (BeautifulSoup, Selenium), PostgreSQL (Neon), MySQL, Data Ingestion (Requests, USGS APIs)

Machine Learning & AI: LightGBM, IndoBERT, TensorFlow, PyTorch, Scikit-Learn, PyCaret, Sentiment Analysis, Topic Modeling, Predictive Modeling, Feature Engineering

Programming & Analytics: Python (Pandas, NumPy, Scipy), SQL, R, Streamlit, Tableau, Git/GitHub

Core Competencies: Statistical Hypothesis Testing, Data Cleaning, Data Quality & Validation

SELECTED PROJECT ML & DATA PROJECTS

End-to-End Bank Marketing MLOps Pipeline | GCP, CI/CD, FastAPI, LightGBM, Hugging Face

- Architected an enterprise-grade MLOps pipeline, benchmarking multiple baseline algorithms including Logistic Regression, and LightGBM to select the optimal predictive model
- Developed a high-performance REST API using FastAPI for real-time inference, featuring automated request logging directly into an integrated database.
- Implemented an automated monitoring layer for Model Drift Detection to track feature distribution shifts and maintain long-term production model accuracy.
- Built and streamlined a continuous integration and deployment (CI/CD) workflow to deploy the system seamlessly onto Google Cloud Platform (GCP) and Hugging Face.

SHOPEE Customer Sentiment & Topic Analysis | Python, IndoBERT, NLP, Streamlit, Deep Learning

- Built an interactive NLP data product to extract actionable user insights and customer feedback trends from thousands of Shopee customer reviews.
- Implemented a fine-tuned IndoBERT deep learning model via a FastAPI backend to perform sentiment classification and semantic topic analysis.
- Designed a clean Streamlit dashboard interface displaying word clouds, sentiment distribution charts, and key customer pain points for strategic marketing decisions.

Global Earthquake Real-Time Tracker & ETL Pipeline | Python, ETL, Neon PostgreSQL, Streamlit, Geospatial

- Designed a real-time geospatial monitoring data system that automates the extraction, transformation, and loading (ETL) of live seismic data via USGS APIs.
- Built a data pipeline to ingest live event streams and store structured spatial data into a cloud-native Neon PostgreSQL database.
- Developed an interactive 3D geospatial dashboard using Streamlit to visualize earthquake distribution points, magnitudes, and historical data trends.

Bank Positioning Strategy & Business Intelligence | Tableau, Business Intelligence, Risk Analysis

- Analyzed large-scale customer and transaction datasets to identify high-value consumer segments and assess credit/financial health risks.
- Developed comprehensive Tableau dashboards tracking key performance metrics, enabling data-driven restructuring of marketing campaigns.

EDUCATION

Indonesia Open University | Bachelor of Statistics | GPA 3.21/4.00

Jan 2021 - Sep 2025

Darus Salam Vocational High School | Software Engineering

Jun 2013 - Jun 2016

EXPERIENCES AND INTERNSHIP

Data Entry & Reporting Support Internship | Central Bureau of Statistics (Kediri)

Aug 2023 - Des 2023

- Managed and processed official regional statistics surveys, executing rigorous data cleaning and consistency verification protocols to handle outliers and anomalies
- Ensured 100% data integrity for high-stakes regional survey data, contributing directly to official city-level statistical reports

LICENCES AND CERTIFICATIONS

Data Science Bootcamp, Shift Academy (2020)

Data Scientist Virtual Internship, Rakamin Academy (2022)
